

HOW MUCH?

How much does it cost to get divorced?

It depends...

FIRST..

Where are you? The amount that it costs to divorce can vary by location. For example, in Los Angeles, costs for a litigated case can range from \$40,000 to \$150,000.

AND...

What are the issues? Do you have children? Property? Do you and your spouse agree on the divorce. When you have fewer issues and agree to many terms, the costs are usually reduced.

AND...

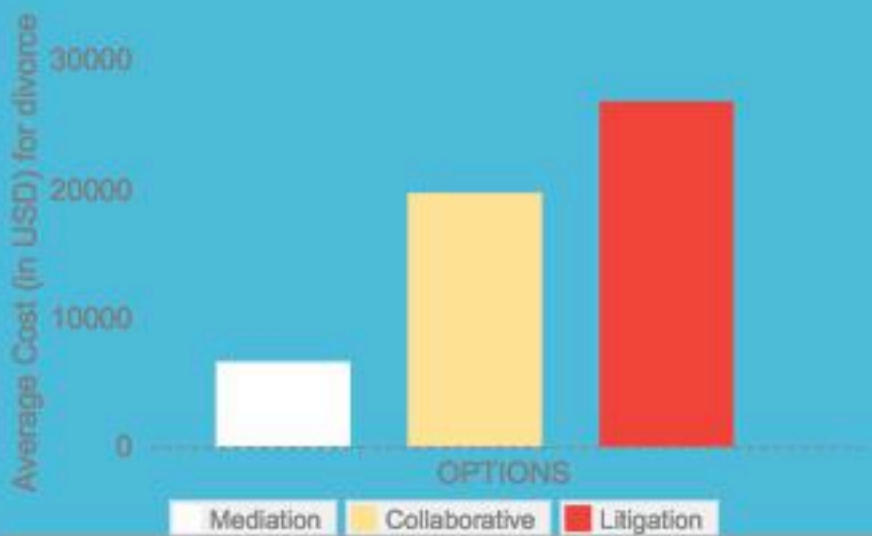

What process are you going to use? When the parties agree to mediation, the cost is often the lowest. When the parties select litigation, that tends to be the most expensive.

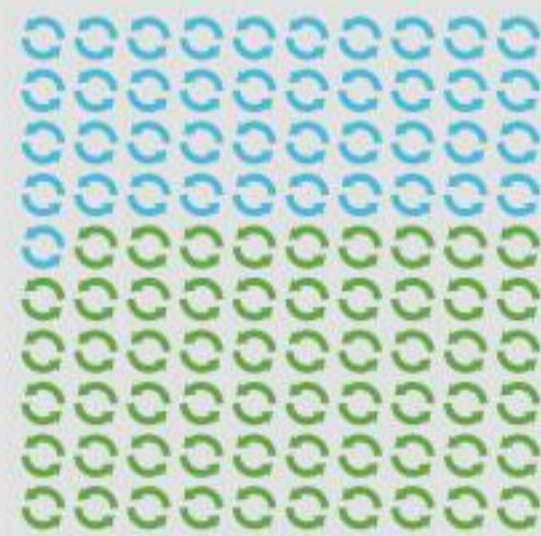

TO SAVE MONEY:

Consider mediation and collaborative law **BEFORE** you decide on litigation.
